About Us

Eagle Encounters is a self-funded non-profit organization, founded by Hank & Tracy Chalmers in 2001.

The land, generously donated by Spier, provides the perfect location for our rehabilitation, release, conservation, education & eco-tourism programs.

Our first priority, in every case, is to rehabilitate and release as soon as possible. Only hand-reared wildlife are retained for education purposes.

We have found that interaction bridges the gap between passive awareness and an active will to conserve.
